

## Commutyble Headlamp Tag *Installation Instructions*

**IMPORTANT: Tags MUST BE AFFIXED** as shown below to operate properly. Holding a tag up or out the window WILL NOT improve signal quality and the gate may not operate.

### INSTALLATION INSTRUCTIONS:

- Headlamp Tag should be affixed to the left – **DRIVER'S SIDE HEADLAMP.**
- Tag **MUST be affixed horizontally** (it will not affect the beam).
- Take care to install tag on clear glass (or plastic) – and at least **2" from edges, top, or bottom.**

**IMPORTANT:** Be sure to keep the backing with the TAG ID for registration on your Vehicle Settings page.

- Peel headlight tag from protective plastic backing and apply sticky side to **MIDDLE OF HEADLAMP** being sure to **mount the tag level to the ground.**

**Commutyble** is actively improving the online user-experience. We are deeply interested in your experience, thoughts, and opinions.

Please provide any **issues, observations, suggestions, and/or critiques** to:
